How much do you know about the art, science & engineering of electroplating and surface finishing?

The NASF Palmetto Southeast Chapter would like to cordially invite you to our Spring 2019 Technical Talk & Luncheon, Metal Finishing Revealed - An introduction into the Art, Science & Engineering of Electroplating.

Our mission is to advocate, disseminate, educate and promote the metal finishing industry and its associated industries. This is an eight-part course for line operators, lab analysts, and plating supervisors charting the fundamentals of electroplating including the basics of electricity, equipment, and a special focus on pre- and post-treatment essentials while exposing participants to nine common plating processes dealing with copper, zinc, chrome and nickel metal deposition.
