

## Environ Solutions Overview:

### **PROCUREMENT:**

We specialize in assisting businesses in acquiring electricity and natural gas contracts through sophisticated and customized approaches. Our methods result in cost savings, budget protection, time efficiency, and improved financial conditions.

- Evaluate current supplier contracts, building energy usage profiles, historical tariffs, market data, risk tolerance, and current efficiency projects.
- Send customized RFP to multiple vetted suppliers.
- Provide an accurate comparison of supplier prices and contracts.
- Assists with account adjustments, including adding/dropping meters
- Interact on the clients behalf with utilities and suppliers
- Evaluate local utility and government policies for financial incentives and reimbursements (tax exemption for manufacturers or nonprofits for example)
- Monitor and identify opportunities and options for renewal.

### **SUSTAINABILITY:**

Comprehensive sustainability services designed to address the core challenges of energy cost, carbon footprint, and efficiency. Our team examines every facet of current and future energy consumption, assisting organizations in strategically establishing, achieving, and surpassing their efficiency and sustainability objectives.

- **Sustainability Energy Consulting Services**
  - Climate Action Plan development
  - Comprehensive greenhouse gas inventory and reduction strategies
  - Carbon offsets and Renewable Energy Certificates (RECs)
  - Energy-efficiency upgrades
  - Green energy procurement
  - Financing energy sustainability
  - Corporate sustainability training
  - Sustainability Tracking, Assessment & Rating System™ (STARS) Survey for higher-education institutions
  - Community Solar
  - Obtaining Rebates
  - Virtual Power Purchasing Agreements (VPPA)
- **Energy Efficiency Consulting**
  - Investment-grade lighting audits
  - NYSERDA Remote Energy Management Program
  - Incentive and grant application submissions
  - Smart metering and energy plant services
  - Building automation modernization
  - Chilled water plant optimization
  - Financing energy solutions
- **Energy Compliance Consulting**
  - Greenhouse Gas Baseline Planning
  - Benchmarking Waste Streams
  - Carbon Compliance Planning
- **Stakeholder Education**
- **Project Financing (EAAS)**
  - Identify Eligible Grants
  - Obtaining Rebates
- **On-site, Self-Generation (aka Behind the Meter projects)**

## SCOPE 5 SOFTWARE:

This software was developed with a focus on sustainability, enabling organizations to manage their ESG data and gain valuable insights for informed decision-making. It offers a comprehensive suite of tools to monitor progress, uncover insights, and foster sustainable transformations within the organization.

- **Key features:**
  - Streamline Data Collection
  - Identify Trends and Set Reduction Targets
  - Track Impact of Reduction Projects
  - Optimize your Resource Consumption & Supply Chain
- **ESG Reporting and Sustainability:**
  - Data Integrity & Transparency - integrated error detection and user alerts
  - Complete Emissions Libraries - up to date libraries of emissions factors from multiple reputable authorities
  - Visual Analytics - rich graphical analytics make it easy to identify outliers and opportunities for improvement
  - Forecasting
  - Target Tracking
  - Streamlined Reporting
  - Automatic Data Transfer – ensures your ESG data is complete and up-to-date
  - Administrative Tools - ease the burden of data collection by delegating responsibility for data to hundreds of team members and vendors
- **ESG Data Management:**
  - Portfolio Manager
  - Tableau - Use Scope 5's Web Data Connector to push data to Tableau so that you can present your ESG metrics alongside all your other business dashboards.
  - Utilities - automatically pulls data from any utility account
  - Concur – maintains your data electronically so that your scope 3 business travel emissions are always up to date.
  - Sub Meters - connects to your facility sub-meters to collect fine grain data.

## ESG CONSULTING:

The services provided focus on aiding companies in developing strong sustainability strategies, improving ESG practices, measuring and enhancing performance, and generating decision-quality reports for diverse stakeholders. Specializing in strategy and performance management, reporting and communication, data management, project management, and quality assurance.

- **Training**
  - Certified Sustainability Reporting Training - GRI, CDP, SASB
  - Private Customized Training
  - ESG Foundations
  - ESG Supply Chain Training
  - EU & SEC Requirements
- **Advisory:**
  - Sustainability/ESG Reporting
  - Policy Development
  - GHG Inventories & Accounting
  - Materiality Assessment
  - Report Reviews/Gap Assessment
  - 3rd Party Verification/Assurance
- **Assurance:**
  - ESG & Decarbonization Strategy
  - Awards & Recognition
  - Goals/Targets

- Road mapping
- ESG Ratings and Rankings
- Management Systems

### ENERGY EFFICIENCY SERVICES:

Specializes in the evaluation, design, and installation of energy efficiency measures for commercial, industrial, and municipal customers.

- **Energy Efficiency Program: Building Upgrades**
  - High Efficiency LED lighting & Lighting Controls
    - Occupancy Sensors
    - LED Cooler Lighting
    - Vending Machine Controls
- **Natural Gas Measures**
  - Pipe Insulation
  - Duct Sealing and Insulation
  - Boiler Reset Controls
  - Programmable Thermostats
- **Custom Mechanical System Measures**
  - HVAC Controls
  - Exhaust Hood Controls
  - Energy Management Systems
- **Building Envelope**
  - Insulation
  - Air Sealing
  - Weatherstripping
  - Air Barriers
- **Water Conservation**
  - Pre-rinse Spray Valves
  - Faucet Aerators
  - Low-Flow Showerheads
  - Swimming Pool Covers
  - High-efficiency Toilets
